### Program aims

The Graduate Diploma of Aviation is a professionally oriented program. The program provides graduates with advanced knowledge of management and business principles, enabling them to critically examine, generate and communicate information relevant to aviation. The program will also provide opportunities to develop critical, evaluative knowledge and skills within the areas of aviation human factors and safety systems.

### Program objectives

On successful completion of the Graduate Diploma of Aviation, students will be able to:

- (1) develop advanced and integrated understanding of a complex body of knowledge within the aviation industry
- (2) solve a range of issues in a professional aviation context with highly developed application of initiative and judgement in planning, problem solving and ethical decision making
- (3) apply advanced aviation knowledge and highly developed skills for professional work and/or further learning
- (4) develop high lev

### **Aviation Human Factors specialisation recommended enrolment pattern**

Students are able to enrol in any offered mode of a course (on-campus, external or online), regardless of the program mode of study they enrolled in.
