### Program aims

The Bachelor of Cyber Security is a program that enables students to acquire a specialised level of knowledge and skills, underpinned by industry experience in Cyber Security, and embedded within industry. The program will provide students with skills in Cyber Security and broaden this knowledge into contemporary domains including audit and risk management, endpoint, web and cloud security, Internet of Things, and leading through influence..

### Program objectives

The objectives of the Bachelor of Cyber Security are to enable graduates to:

- synthesise and apply Cyber Security specific knowledge, including emerging and re-emerging theories and concepts, to a range of industry contexts
- examine, analyse, implement, and articulate a range of innovative solutions to a variety of Cyber Security industry contexts
- apply specialised cognitive and certified technical skills to investigate, critically reflect and synthesise complex ideas at a pragmatic level
- effectively work in a project team environment

This program is at AQF Qualification Level 07. Graduates at this level will have broad and coherent knowledge and skills for professional work and/or further learning.

The full set of levels criteria and qualification type descriptors can be found by visiting [www.aqf.edu.au](http://www.aqf.edu.au).
